

**Welcome to CSI Global Services, an Autodesk Consulting System Integrator Partner.**

To achieve your results with greater accuracy, more predictability, Building Information Modeling (BIM) allows your organization Reduced cost, and less risk, ultimately providing you with higher Returns and greater productivity.

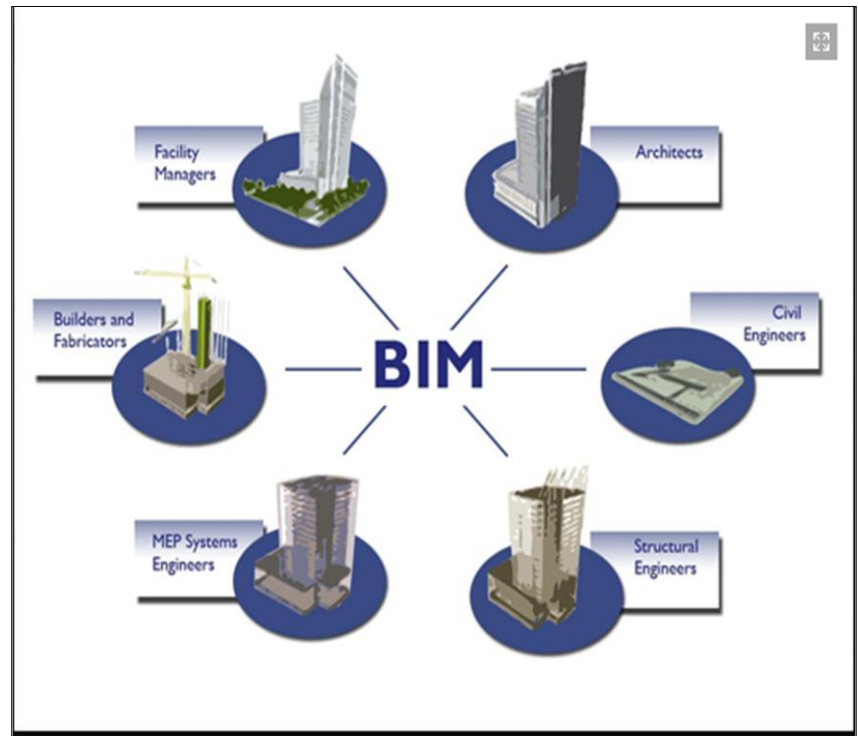

AT CSI Global services we are committed to providing technical, experienced people to assist you with the

**Autodesk CSI**

CSI Global Services has a strategic partnership with Autodesk as a consulting systems integrator. We work closely with Autodesk to ensure that organizations in the Architectural, Engineering, and Construction industries across the globe are assisted in their Building Information Modeling processes, through the latest technology, and the expertise of our technical staff.

**Services that are covered under the partnership:**

- Change management
- Business process transformation
- Modeling management and expertise
- System integration
- Pre-construction or tender services
- Methodology adoption
- Implementation
- Data Integration, management, and collaboration
- Supply chain management
- Lifecycle BIM advice
- Construction BIM advice

Autodesk BIM software solutions covers all aspects of design, visualization, simulation and collaboration, allowing you to make informed decisions that save time, are more economical, and have less of an environmental impact
