

Company Overview

Gehry Technologies is an AEC technology development and consulting company providing leading edge solutions to the industry's most challenging projects. Our clients include some of the most recognized international architects, engineers, contractors, and owners working on some of the world's most ambitious projects.

Gehry Technologies offers a unique approach to serving the needs of our clients. We provide technology and services tailored to integrate the specific values and capabilities of the overall project and each member organization.

We support the adoption of BIM technology and processes through project based services, allowing teams to advance their use of these critical systems while meeting project schedules. We provide training and knowledge transfer as part of every engagement. Working with Gehry Technologies, project teams can innovate with confidence, while serving shared goals of highest quality, speed, and maximum value.

Autodesk Partnership

Building projects are more complex than ever before. Challenging economic conditions and an increasingly competitive global environment are requiring firms to produce higher quality, more innovative designs, and deliver them faster, at lower cost and with less waste. Building professionals are turning to Building Information Modeling (BIM) processes, workflows, and intelligent 3D design software to help them meet these challenges.

Gehry Technologies and Autodesk have formed a strategic partnership to assist architecture, engineering and construction (AEC) firms, and owners, operators and enterprises across the globe to transition their businesses to support advanced Building Information Modeling (BIM) workflows, as well as achieve cost and time savings on their projects by utilizing Autodesk and other state-of-the-art technologies

For existing clients, the relationship will drastically expand the breadth and depth of Gehry Technologies' service offerings. Autodesk products, like the [Autodesk Building Design Suites](#), the [Revit](#) family of products, [Autodesk Navisworks](#) and [AutoCAD Civil 3D](#) have always been part of the toolkits which Gehry Technologies has utilized to deliver complex projects on time, at cost and with reduced risk. Through this partnership, Gehry Technologies aims to help existing customers get better value and impact from Autodesk technologies

Office locations: US, ASIA, Europe & Middle East
