

AutoCAD Map 3D 2011 Hotfix for Esc Key Readme

Thank you for downloading the Esc Key HotFix for AutoCAD® Map 3D 2011

This readme contains the latest information regarding the installation and use of this update.

It is strongly recommended that you read this entire document before you apply this update to your product. For reference, please save this document to your hard drive or print a copy.

Affected Products

This update applies to the following products:

- AutoCAD® Map 3D 2011

Issue Resolved by This Update

After repeatedly selecting objects in Map 3D 2011, the Esc key will no longer empty the pickfirst selection set. After this occurs, further selection of objects will not be possible. Saving the drawing and restarting Map 3D 2011 restores correct selection behavior. This hotfix will eliminate the need to restart Map 3D 2011 to restore the selection behavior.

Installation Instructions

To install the Esc Key Hotfix

NOTE: This installation process requires you to modify an installed product, which may cause Windows security warnings to appear. For all Windows security warnings that appear during installation, click Continue.

1. Close all software applications.
2. Navigate to the folder where your AutoCAD product is installed, for example, *C:\Program Files\Autodesk\AutoCAD Map 3D 2011*.
3. In the folder specified in Step 2, right-click *AcMapRibbonWrapper.dll* and rename it *AcMapRibbonWrapper.dll.bak*
4. Download the zip file and extract the *AcMapRibbonWrapper.dll* to a temporary folder, for example, *C:\Temp*.
5. Copy the *AcMapRibbonWrapper.dll* to the folder specified in Step 2.

NOTE: To remove this hotfix, delete the new *AcMapRibbonWrapper.dll* file that you downloaded to the folder specified in Step 2 and restore the file you renamed in Step 3 to its original name.

Files Patched by This Update

The following files will be updated in this directory : **<local_drive -> Program Files\Autodesk\AutoCAD Map 3D 2011:**

AcMapRibbonWrapper.dll
