

# Prepare your students. Validate their knowledge.

The Autodesk Academic certification program enables students to earn a credential that recognizes their knowledge of specific Autodesk software applications. Students can demonstrate their software skills and gain a competitive edge in their academic and professional careers. Institutions benefit by being able to provide a powerful method to effectively measure student competencies.

This comprehensive program for secondary and postsecondary students provides professional-level exams at an affordable academic price. The program also provides student-oriented convenience by letting them take examinations at a local school. The result: the same credential earned by working professionals.

In addition, Autodesk Academic certification exams support career pathways in architecture and construction; manufacturing; and science, technology, engineering, and mathematics (STEM). The exam objectives align to national academic standards for science, technological literacy, mathematics, and language arts.

## Program Features and Benefits

### Certification Exams Available

- AutoCAD® 2009 and 2010
- Autodesk® Inventor® 2009 and 2010

### Classroom Delivery Available

Easy-to-implement Autodesk certification exams can be delivered online in your classroom using the Autodesk Online Testing System. There are no fees to become an Autodesk Certification Center.

### Validate Students' Knowledge of the Current Product Release

How well do your students know an Autodesk application? An Autodesk Assessment test is an online examination that assesses their knowledge of the tools, features, and common tasks in a specific Autodesk application. Available 24/7 through the web, these exams can help students assess their readiness for certification.

### Use Autodesk Official Training Guides and Exam Guides for Preparation

Autodesk Official Training Guides and the comprehensive Exam Guides enable students to review the knowledge and skills covered in a specific certification exam. Each book includes lessons covering the main sections of the examination as well as exercises for most of the performance tasks students will be required to complete during the examination.

**Design plays an important part in many careers. Whatever career paths your students choose, certified Autodesk® software expertise can give them a valuable head start.**
