# Design Drives Success

Design, more than any other factor, has the power to influence purchase decisions that consumers make. In today's competitive global marketplace, designers are under pressure to come up with new, innovative designs that address both form and function—and to do so quickly.

## Facing these issues?

- Staying ahead of the competition requires consistently producing innovative designs.
- Design intent is lost or altered during engineering.
- Moving between multiple software applications interrupts design workflow.
- Projects are delayed waiting for design review decisions.
- Design and engineering teams struggle to collaborate on 3D design data.

## Tools for the Creative Design Process

The Autodesk® AliasStudio™ product line addresses the unique creative requirements of the entire industrial design workflow, combining creativity with craftsmanship. It has powerful tools for surface definition and optimizes the design process with industry-leading sketching, modeling, and visualization tools that quickly bring ideas to reality in a single environment and in less time.

## Capture and Communicate Digital Design Intent

Communication is a key component of design. AliasStudio provides a complete set of tools for concept design and communication, reducing the time required to create high-quality imagery for clear, efficient, and persuasive visual communication. AliasStudio helps designers tell their story—clearly and effectively—to sell ideas and avoid holding up projects waiting for design review decisions.

## Own the Design

AliasStudio enables designers to own their designs further into the development process with tools to efficiently refine model details and create production-quality data for downstream use. Designers retain ownership of designs and incorporate changes later in the process, increasing the flexibility of design decisions and preventing design intent from being altered or lost during the engineering phase. AliasStudio also supports collaboration between designers and engineers to help ensure that both aesthetic and functional requirements are efficiently addressed in design solutions.

**AliasStudio has provided a great return on investment because we have been able to reach our vision of increasing sales by consistently delivering innovative designs and bringing the product to market quickly.**
