Yes, AutoCAD 2010 software supports multiple CPUs. The performance of AutoCAD graphics and rendering systems benefits from multiple CPU systems.

5. Licensing

5.1 Does AutoCAD 2010 software use product activation for stand-alone licenses?

Yes, with AutoCAD 2010 software the authorization process includes product activation.

5.2 What is product activation?

Product activation is a software-based license management technology incorporated into many Autodesk products. It is a secure and trouble-free process that authenticates licensed users running Autodesk software. The process verifies that the serial number is legitimate and has not been activated on more computers than are eligible. It does not affect the ability of licensed users to operate their software the way they have always done. It is similar to the authorization mechanism in Autodesk products in the past but provides additional capabilities for security and special product versions (such as student and trial versions).

5.3 Why is Autodesk requiring Autodesk customers to activate their software?

Product activation is a simple way to reduce and deter unauthorized use and casual copying of Autodesk products, with little to no impact on loyal customers.

5.4 How do I activate my software?

Through the activation and registration interface, you can activate your product 24 hours a day, seven days a week, over the Internet or via email. Either option takes only a few steps to complete and requires your product serial number and registration information.

5.5 What if I have more than one computer? Will product activation allow me to use the software on multiple machines?

Autodesk recognizes that some users may need to operate the software when they are away from their usual work location. To accommodate this need, the product activation technology and the AutoCAD software End-User License Agreement allow an employee to install the software on a second computer owned by the employee's company, provided it is for use away from the employee's usual work location, the two copies are used only by that employee and no other, and only one copy of the software is ever in use at any one time.

5.6 How do I transfer my software license to another machine?

The Online License Transfer (OLT) Utility allows licenses to be moved between machines. The OLT replaces the former Portable License Utility. To transfer a license, simply start the transfer utility and choose Export. Then log in to the OLT website and "park" your license at Autodesk. At the destination computer, start the transfer utility and choose Import. Log back in to the OLT website and import your license.

5.7 Where can I find more information about software activation?

More information on product activation can be found at www.autodesk.com/activation.
