Mobile access made easy.

The WebDAV protocol lets you access shared folders over HTTP. Just set up the connection in the AutoCAD WS web application to make your folders accessible via mobile devices.

4 Co-edit drawings— at the same time.

Collaborate with colleagues by editing designs simultaneously from your web browser or mobile device. When you change or annotate the drawing, your colleagues can view the edits on their smartphones and tablets using the AutoCAD WS app or on their desktop computers using the AutoCAD WS web app.

Chat while you edit.

You can even chat with colleagues if you co-edit across two or more web browsers.

5

5 Save time and streamline your workflow.

Everything stops when someone has a question—and time is money. Keep projects moving forward by sharing files with construction managers, architects, designers, and other stakeholders located across the globe—from New York to London to Dubai. View DWG files from a mobile device to answer questions immediately and collaborate in real time with teams—whether they're at the office or in the field.
