## *Installation Instructions*

Note: You must have **Autodesk Quantity Takeoff 2012** and **hotfix 1** installed on the system in order to see the results of this hotfix.

### To Install the Hotfix

1. Close all software applications.
2. Unzip aqto\_2012\_hotfix2.zip to your local machine.
3. Install the hotfix by one of the following options:
  - Option #1: Automated installation
    - Run **Install.bat** to automatically install all fixes onto your machine. (Ensure you run it as Administrator for Windows Vista or Windows 7 and close the “User Account Control”.)
  - Option #2: Manual installation
    - Navigate to the folder where Autodesk Quantity Takeoff 2012 is installed.
      - Default install folder for 32-bit Windows operating system:  
C:\Program Files\Autodesk\Quantity Takeoff 2012\

- Default install folder for 64-bit Windows operating system:  
C:\Program Files (x86)\Autodesk\Quantity Takeoff 2012\
  - Rename the affected original files. See [File Patched by This Update](#) for a list of files to rename. For example, in the folder, right-click the **DwfCompare.dll** file and rename it **DwfCompare.dll.bak2**.
  - Extract the files in the aqto\_2012\_hotfix2.zip and copy them to the appropriate locations. See [File Patched by This Update](#) for locations of files.

### To Remove the Hotfix

1. Close all software applications.
2. Unzip aqto\_2012\_hotfix2.zip to your local machine.
3. Remove the Hotfix from your computer by one of the following options:
  - Option #1: Automated Un-installation
    - Run **UnInstall.bat** to automatically remove all fixes from your computer. (Ensure you run it as Administrator for Windows Vista or Windows 7 and close the "User Account Control".)
  - Option #2: Manual Un-installation:
    - Navigate to the folder where Autodesk Quantity Takeoff 2012 is installed.
      - Default install folder for 32-bit Windows operating system:  
C:\Program Files\Autodesk\Quantity Takeoff 2012\
        - Default install folder for 64-bit Windows operating system:  
C:\Program Files (x86)\Autodesk\Quantity Takeoff 2012\
          - Delete the files listed in [File Patched by This Update](#) section.
          - Rename all files ending with ".bak2" by removing the ".bak2" extension. For example, in the folder, right-click the **DwfCompare.dll.bak2** files and rename it **DwfCompare.dll**.
