

COMPANY INTRODUCTION

China Construction Design International Group (CCDI) is the most recent partner to join the Autodesk Consulting System Integrator Partner Program ecosystem.

Founded in 1994, CCDI is a large architectural consulting firm that provides integrated services for urban construction and development. We have business units covering broad industry sectors to achieve specialization. Five regional offices that are located in Shanghai, Beijing, Shenzhen, Chengdu and New York, as well as branches and representative offices in Chongqing, Nanjing, Tianjin, Wuhan, Xi'an, and Kunming, set up our operations cross-regionally. Successful cases of our company include National Aquatics Center - Water Cube, National Tennis Center, Shenzhen Ping'an International Financial Center, Rockbund Shanghai, Jinan Olympic Sports Center, Shenzhen Dameisha Vanke Center, Hangzhou Olympic Sports Center, Harbin West Railway Station, Harbin Taiping International Airport, Kunlun Apartment CBD Beijing, City Crossing Shenzhen Phase II, Tianjin Vanke Crystal City and Tianjin International Cruise Home Port. Since its founding, CCDI has made remarkable technological advancements in independent innovation and environmental protection.

CCDI adopts a modern enterprise management system to set up practical operational policies that maximize the capabilities of a Chinese design firm. It employs nearly four thousand outstanding architects, engineers, planners, consultants, project managers and management consulting professionals. To offer consulting, architectural design, construction management, engineering, and other related services in the fields of general building, rail transportation, industries, etc. We strive to provide our customers with systemic and comprehensive solutions.

Based on its deep understanding of AEC industry and rich experience of **BIM(Building Information Modeling)** adoption, CCDI has been integrating diverse technologies and resources, to provide a digitized engineering consultancy services in AEC industry, which includes building data centralization, facility platform integration, engineering consultancy service, etc.

CCDI has become the largest design and consulting firm for integrated urban development service in China with its business in Asia, US, Middle East, and Africa region.
