

Extension 2 Service Pack 2 Release Notes

Extension 2 Service Pack 2 includes a number of fixed bugs.

You must install DKU 7.5.1 before you install Service Pack 2.

Fixed Bugs

Key	Component/s	Summary
FLPR-8884	3D Interoperability	Point Cache is lost when restoring a project from a previous release.
SMOK-11522	Animation Editor	Animation menu disappears in Batch.
SMOK-12195	Archive Restore	Unable to do a Restore archive selection from legacy release: Assertion `view' failed.
SMOK-11217	Archive Restore	Restoring a project archive creates a new project but does not load the clips.
SMOK-12676	Audio	Audio timewarp not rendering
SMOK-11248	AVIO	Can't enter the output module with a stereo clip if the broadcast timing matches the clip timing.
SMOK-11040	AVIO	Can't layoff 23psf clips to VTR with real-time 2:3 pull-down using standard output module or 25p clips as 50i.
SMOK-12088	Backburner	Must re-install Backburner manager if you modify options from the web monitor while it is running.
SMOK-11989	Backburner	Crash exiting Batch after undoing the adding of a node, if the node's menu is displayed and the node is unselected.
SMOK-11817	Batch	Crash after modifying LUT settings on a clip node that has been deleted from the workspace.
SMOK-11537	Batch	Crash when entering Colour Corrector from Action Media List if there is a LUT editor conversion done to the back plate.
SMOK-11525	Batch	Crash when viewing the context of an Action node with slip on matte media.
FLPR-8698	Batch	Flare: Crashes when clicking matte input node in BFX editor.
SMOK-11361	Colour Management	Image Data Type Bypass option should not be applied to 3D LUTs.
SMOK-11188	Conform	Conform EDL: Manually linking media crashes application.
SMOK-10589	Conform	AAF conform: does not link correctly when using only UMID clips.
FLPR-8891	Creative Tools	Black result when using non 12bit back clips on Gap BFX. May also lead to a crash in Colour Corrector from Action and Blend & Comp .
FLPR-8868	Creative Tools	Performance degradation when rendering from a tool in the Tools tab.

Extension 2 Service Pack 2 Release Notes

SMOK-11301	Creative Tools	Explode BFX doesn't refresh properly.
SMOK-11165	Data Management	Crashes with the Wiretap path translation tool.
SMOK-9583	Data Management	Poor performance on Wire transfers FDR to FDR on InfiniBand and 40 GigE network.
SMOK-12134	Data Management	Error message when scrubbing in timeline while proxies are generated: FRAMESTORE : Lost disk No error.
SMOK-11920	Data Management	Crash when wiring a clip that has tracks and layers of different lengths from 2012.
SMOK-10121	Data Management	Default gateway interface should be favoured in sw_probed.
SMOK-12235	Desktop	Clips are displayed in the wrong order when they are loaded from the Media Library to a Desktop reel in Thumbnail view.
SMOK-12233	Desktop	Clips moved from reel to reel are placed in the wrong order after an undo.
SMOK-12230	Desktop	Can't undo moving clips on a Desktop reel.
SMOK-12127	Desktop	Cut, copy, paste, and drag & drop of multiple clips on Desktop reel is unpredictable.
SMOK-11918	Desktop	With Broadcast Monitor enabled, wrong proxy is displayed for a frame that has been extracted from a sequence.
SMOK-11856	Desktop	Moving clips in thumbnail view changes the order of clips on the Desktop reel.
SMOK-11855	Desktop	Desktop Snapshot: Clips are loaded in the wrong order.
FLPR-8925	Desktop	Batch render results should appear at the end of the reel instead of the beginning.
FLPR-8894	Desktop	App becomes sluggish when doing a snapshot bump on a reel.
SMOK-12122	Desktop	Crash in the Text Timeline FX after deleting a clip on the Desktop.
SMOK-11846	Desktop	Changing reel to thumbnail view changes the order of clips order on the reel.
SMOK-10869	Desktop	Desktop Snapshot reel contents are displayed alphabetically instead of desktop reel order.
SMOK-11907	Desktop	Folder hierarchy is flatten when restored from a Shared Library
SMOK-11355	Desktop	Crash when going to the Conform tab after making changes to a node setup.
SMOK-11304	Desktop	Crash when dragging an effect from the Timeline effects pipeline to the Media Library.
SMOK-11254	Desktop	Cannot rename a clip in the Flare Media Library or when Protect From Editing is enabled from another software.
SMOK-11215	Hardware, configuration and OS	Tablet does not work on z820 with 2013 SP4 and 2013 Extension 2.

Extension 2 Service Pack 2 Release Notes

SMOK-11309	Hardware, configuration and OS	dIConfigCheck with BIOS 2.08 not picking up errors with AJA and InfiniBand slot positions on z820.
SMOK-12428	Hardware, configuration and OS	dIConfigCheck with BIOS 1.14 not picking up errors with slot positions on z820.
SMOK-11308	Hardware, configuration and OS	DKU must include latest certified BIOS for HP z820.
SMOK-10830	Hardware, configuration and OS	License Transfer Utility shortcut not working with Smoke on Mac standalone
SMOK-12135	LUSTRE: Colour Management	Using Bypass All when Aces colour translation is enabled on render output crashes Lustre.
SMOK-11491	LUSTRE: Processing Tools	Wrong cropping applied to an image while scrubbing horizontally with AJA active in play out.
FLPR-6778	LUSTRE: Processing Tools	Convergence data no longer saved in the grade bin.
FLPR-8755	LUSTRE: Timeline	Missing shot after loading a changelist that includes a cut on a container/multi-channel clip.
SMOK-11805	LUSTRE: Wiretap Gateway	Vertical/Horizontal values are not scaled (Image > Reposition) according to Debayered resolution.
SMOK-9430	Media import/export	Export fails if there are muted effects in the timeline.
SMOK-10586	Media import/export	Cannot read correct TC from Avid MXF file.
SMOK-10564	Media import/export	MXF from Avid Media Composer in DF TC mode is imported as NDF.
SMOK-11330	Media import/export	MXF import: Audio track corrupted.
SMOK-10858	Media import/export	Importing MXF Audio files from Avid Media Composer 5.5 results in intermittent errors.
SMOK-11333	Player	Crash when exiting full-screen player after adding new media in Action.
SMOK-12475	Preferences and user management	Missing button to restart Wiretap Gateway from within the application.
SMOK-12262	Rendering	Timeline render slower than previous versions.
SMOK-12264	Sparks	Crash when rendering a Spark that has no input.
FLPR-8763	Timeline	GMask disappears in the Axis timeline effect if motion blur is enabled.
SMOK-12256	Timeline	Crash when trimming a container with a timewarp.

Extension 2 Service Pack 2 Release Notes

SMOK-12133	Wire	Pending render and red frames when wiring clips.
SMOK-12341	Wiretap	Unable to create libraries using wiretap_create_node in projects created using wiretap_create_node
SMOK-11841	Wiretap	Wiretap crashes in Lustre when browsing framestores with 3 or more volumes.
SMOK-11152	Wiretap	Wiretap needs to have an active network connection on Linux.
SMOK-11151	Wiretap	Lustre Burn with Wiretap Gateway not working.
