

**Orbital Integrated Solutions** have been a leading IT solutions provider for over 14 years, with a focus on delivering world-class Enterprise Application Integration projects based on SOA Business Process Management and IT Life-Cycle Management solutions, on-time, on-budget and to consistently exceed our client's expectations.

### **ENTERPRISE APPLICATION INTEGRATION**

Orbital has expertise in the design, implementation and management of complex Application Integration Projects across multiple industries. Our methodology is based on the principles of Service Oriented Architecture (SOA). At its simplest, SOA gives you business value by developing a more flexible IT infrastructure enabling you to adapt faster to Market, Competition and Supply Chain pressures.

“Service-oriented Architecture (SOA) is not new, but widespread use of SOA is. If you don't yet know about SOA and how it will change your enterprise's IT architecture, you are placing yourself at a competitive disadvantage” states Gartner in 2007.

Orbital's EAI solutions utilize IBM's Webspere technologies (MQ, Message Broker, Datapower, ESB etc.), together with our own consultancy services to deliver a robust, scalable and cost-effective architecture platform.

**Orbital Integration Solutions** became a member of the Autodesk Consulting System Integrator Specialist partner program in May 2012 as the first cloud integration SI partner in the UK.
