

PCO Innovation is the largest international independent service group specialized in Product Lifecycle Management (PLM)

Determining the right PLM strategy for entire organizations, reducing the risks and costs associated with software acquirement and implementation, increasing the efficiency of everyone involved in the innovation process through the optimal use of the their PLM system, increasing PLM knowledge and competencies - these are just a few examples of the challenges that can force companies to make major transformations to their organization, processes and information systems.

To assist companies in successfully navigating these changes, **PCO Innovation** provides a complete service offer that focuses equally on each company's core business and on technology. Our offer is backed by a team of over 600 consultants and technological experts operating on all 5 continents, both as staff support and in project mode. Our clients include numerous key players in the fields of Aeronautics & Defense, Automotive & Transportation, Manufacturing, Electricity & Electronics, Engineering & Processes, Pharmaceuticals, Food and Beverages, and more.
