## **Voluntary Product Accessibility Template®**

### **Version 1.3**

The purpose of the **Voluntary Product Accessibility Template**, or **VPAT™**, is to assist Federal contracting officials and other buyers in making preliminary assessments regarding the availability of commercial “Electronic and Information Technology” products and services with features that support accessibility. Autodesk provides this information to help our customers understand the accessibility features of this Autodesk product in the context of the Section 508 standards. This was done with the intent to enable agencies to be compliant with the Section 508 regulations. This document is not intended to be a certification of compliance. It is assumed and recommended that offerers will provide additional contact information to facilitate more detailed inquiries.

The first table of the Template provides a summary view of the Section 508 Standards. The subsequent tables provide more detailed views of each subsection. There are three columns in each table. Column one of the Summary Table describes the subsections of subparts B and C of the Standards. The second column describes the supporting features of the product or refers you to the corresponding detailed table, e.g., “equivalent facilitation.” The third column contains any additional remarks and explanations regarding the product. In the subsequent tables, the first column contains the lettered paragraphs of the subsections. The second column describes the supporting features of the product with regard to that paragraph. The third column contains any additional remarks and explanations regarding the product.

**Date:** March 5, 2010

**Name of Product:** mental ray Standalone 2011

## **Summary Table**

**VPAT™**

### **Voluntary Product Accessibility Template®**

| <b>Criteria</b>   | <b>Supporting Features</b> | <b>Remarks and explanations</b>   |
|---|----------------------------|---|
| Section 1194.21 <a href="#">Software Applications and Operating Systems</a>     | Supports                   | See section 1194.21 for details.  |
| Section 1194.22 <a href="#">Web-based Internet Information and Applications</a> | Not Applicable             |   |
| Section 1194.31 <a href="#">Functional Performance Criteria</a>                 | Supports                   | See section 1194.31 for more details. Overall, the product allows a user with a compatible AT to perform all tasks. |
| Section 1194.41 <a href="#">Information, Documentation and Support</a>          | Supports                   | See section 1194.41 for details.  |

## **Section 1194.21 Software Applications and Operating Systems – Detail**

**VPAT™**

### **Voluntary Product Accessibility Template®**

| <b>Criteria</b>  | <b>Supporting Features</b> | <b>Remarks and explanations</b> |
|--|----------------------------|---------------------------------|
| (a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually. | Supports                   |                                 |
| (b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry                | Not Applicable             |                                 |

|  |                |  |
|--|----------------|--|
| standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer. |                |  |
| (c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.   | Not Applicable |  |
| (d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.   | Not Applicable |  |
| (e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.   | Not Applicable |  |
| (f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.  | Supports       |  |
| (g) Applications shall not override user selected contrast and color selections and other individual display attributes.   | Not Applicable |  |
| (h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.  | Not Applicable |  |
| (i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.   | Not Applicable |  |

|  |                |  |
|--|----------------|--|
| (j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.  | Not Applicable |  |
| (k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.   | Not Applicable |  |
| (l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues. | Not Applicable |  |

## ***Section 1194.31 Functional Performance Criteria – Detail***

### **VPAT™**

### **Voluntary Product Accessibility Template®**

| <b><i>Criteria</i></b>  | <b>Supporting Features</b>                | <b>Remarks and explanations</b>   |
|---|---|---|
| (a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.  | Supports when combined with Compatible AT | All output from the software is textual in nature, and can be read through a screen reader. |
| (b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided. | Supports                                  |   |

|  |                |  |
|--|----------------|--|
| (c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided                    | Not Applicable |  |
| (d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided. | Not Applicable |  |
| (e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.                                  | Not Applicable |  |
| (f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.                                      | Not Applicable |  |

## ***Section 1194.41 Information, Documentation and Support – Detail***

### **VPAT™**

### **Voluntary Product Accessibility Template®**

| <b><i>Criteria</i></b>  | <b>Supporting Features</b> | <b>Remarks and explanations</b>  |
|---|----------------------------|--|
| (a) Product support documentation provided to end-users shall be made | Supports.                  | Support documentation is available in hard copy, PDF and HTML formats upon request through |

|   |           |   |
|---|-----------|---|
| available in alternate formats upon request, at no additional charge  |           | Product Support.  |
| (b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge. | Supports. | This document is posted on our website at <a href="http://www.autodesk.com">http://www.autodesk.com</a> by searching for "Section 508". |
| (c) Support services for products shall accommodate the communication needs of end-users with disabilities.   | Supports. | Support services options are available via web form support and phone support.  |
