Autodesk® Building Design Suite is a comprehensive software solution that can help you design and communicate more effectively.

Autodesk Building Design Suite gives you the power of BIM, with tools for modeling, visualization, and documentation, so you can compete for new work, whether the project requires BIM or CAD.

Three editions of Autodesk Building Design Suite are available to meet your particular business needs and offer you the depth and breadth of the Autodesk portfolio.

**Autodesk® Building Design Suite Standard:**
Autodesk Building Design Suite Standard is for building designers, drafters, and detailers who need a foundational set of tools to efficiently design, document, and share drawings in the native DWG™ file format.

- Create better buildings with intelligent, 3D model-based design
- Produce compelling visualizations to market ideas more successfully
- Use integrated analysis to help inform design and construction decisions

**Autodesk® Building Design Suite Premium:**
Autodesk Building Design Suite Premium is for architects and engineers who need an optimized set of tools including the power of BIM with Autodesk® Revit® software products, the familiarity of AutoCAD® software applications for efficient documentation, and Autodesk® 3ds Max® Design software for compelling visualizations.

- Create better buildings with intelligent 3D model-based design
- Produce compelling visualizations to market ideas more successfully
- Use integrated analysis to help inform design and construction decisions

**Autodesk® Building Design Suite Ultimate:**
Delivers the full power of BIM with an advanced set of tools that extend beyond design into construction. Ideally suited for construction professionals, this edition builds on the Premium edition by including Autodesk® Navisworks® Manage software for an integrated approach to multidisciplinary coordination; Autodesk® Inventor® to collaborate more effectively with building product manufacturers and fabricators; and Autodesk® Quantity Takeoff for use in design-to-cost-estimating workflows.

**Are you facing these issues?**
- Need to be more competitive
- Constantly under pressure to control costs and do more with less
- Tired of separately deploying, installing, and managing non-integrated software tools
- Want to compete for projects that feature BIM workflows, but you use CAD
- Need an economical entry point for BIM
- Looking to get more out of your current investment in the BIM process
- Want to collaborate more effectively with project team members
- Struggling to manually coordinate your design with design data in different file formats
- Need the competitive edge of high-end visualizations and walk-throughs
- Spending too much time trying to communicate your design
- Need multidiscipline design software to more easily work with design partners
- Want to improve constructability and reduce rework costs

Learn how Autodesk Building Design Suite can help you overcome these issues and accelerate your path to new business.
