

Streamline 7.0 Handbook for 6.4 Users

Following are the highlights of the new features in Autodesk Streamline 7.0. For more detailed information, please use the Streamline online help as a resource.

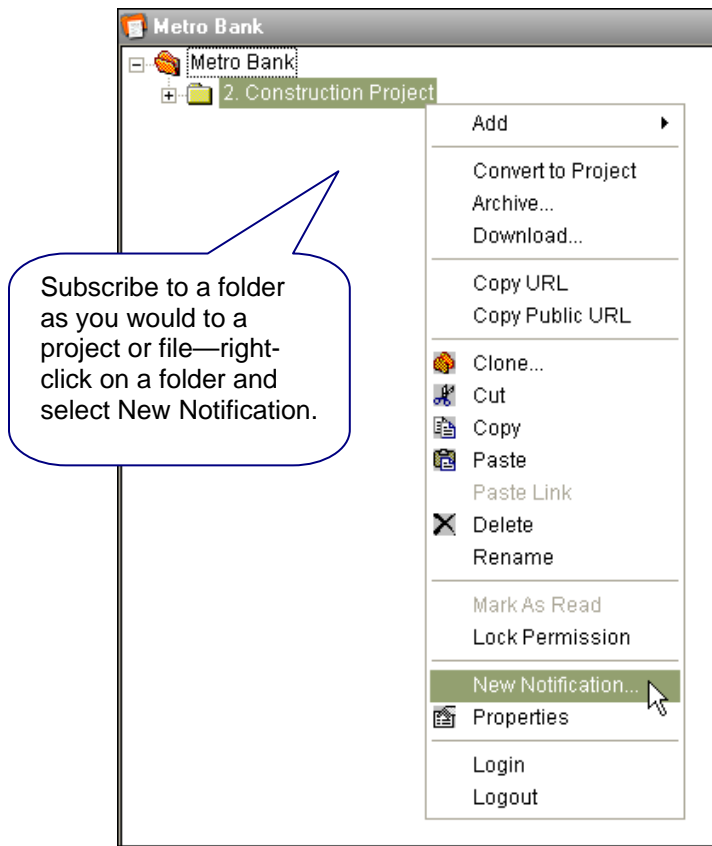

Upgrade Management *(for Site Administrators only)*

The Upgrade Management feature provides you, the Site Administrator, better control over the adoption of newer versions of Streamline throughout your organization and across your extended project teams, so that all of your site members can benefit from the latest features and performance enhancements developed by Autodesk. The last required download for Streamline was version 6.0 in September 2004, and there have been five major updates to the Streamline client software since then. The Upgrade Management feature enables you to set the minimum required version to any major release (e.g. 6.0, 6.1, 6.2, 6.3, 6.4, or 7.0). Once you have set this control, any site members that log into your site with previous versions of Streamline will be prompted to download the latest version.

Subscription Notification for Folders

The Notification Manager now includes subscription notifications for Folders (in addition to Project Folders and Files), for any changes to Files, Folders, or Projects below the Folder in the Streamline file hierarchy. This allows you and your site members to more easily track changes on your projects.

Occasionally, Autodesk makes statements regarding planned or future development efforts for our existing or new products and services. These statements are not intended to be a promise or guarantee of future delivery of products, services, or features but merely reflect our current plans, which may change. Purchasing decisions should not be made based upon reliance on these statements. The Company assumes no obligation to update these forward-looking statements to reflect events that occur or circumstances that exist or change after the date on which they were made. Autodesk is not responsible for typographical or graphical errors that may appear in this document.
