

**Jim Lynch**  
**Vice President, Building Product Line Group**

**Architecture, Engineering, & Construction**  
**Division (AEC)**

**Autodesk, Inc**

Jim Lynch is a 25 year veteran of the CAD industry and has served in a variety of senior management roles in the building, manufacturing, and electronic design automation industries. As Vice President of the Building Product Line Group for Autodesk's AEC Division, Jim and his team are responsible for creating Autodesk's building industry strategy and go-to-market plans, and for designing and developing the Revit portfolio of products.

Prior to his Building Product Line role, Jim was the Vice President of Industry Marketing for Autodesk's AEC Industry Group, where he and his team were responsible for developing and driving the business strategy and execution plan for Autodesk's industry leading design and management solutions that serve the AEC industry.

Prior to his role as AEC Industry Marketing Vice President, Jim served as Senior Director of Product Development, responsible for leading the division's global software engineering activities. Jim joined Autodesk in 1997 and led the design and implementation of their next generation Mechanical CAD solution, Autodesk Inventor.

Before joining Autodesk, Jim spent over eight years at Oregon-based Mentor Graphics, a global leader in Electronic Design Automation. He holds a BS in Computer Science from Fitchburg State College
